Marwan Ahmed Fouz *Frontend Software Engineer*

Marwanfouz76@gmail.com 01201 910413 Egypt linkedin.com/in/marwanfouz

https://github.com/Marwanfouz https://marwanfouz.tech

Profile

Frontend Developer specializing in React.js and Next.js, with backend experience in Node.js and Prisma. Skilled in building scalable, high-performance web apps with clean code and optimized UI/UX. Active open-source contributor and effective collaborator in distributed teams.

Work Experience

Frontend Engineer 2024/07 – Present
LinkedTrust (*Remote*) Remotely

- **Developed and maintained reusable frontend components**, improving scalability, reducing feature delivery time by 20%, and **optimizing search speed by 25%**, using React.js and Next.js.
- **Collaborated with distributed teams across multiple time zones**, ensuring timely delivery of performant web applications.
- Developed and maintained reusable frontend components, improving scalability, **reducing feature delivery time by 20%**, and optimizing **search speed by 25%**, **by refactoring backend queries in Node.js**.
- **Optimized component architecture and implemented advanced theming**, reducing rendering time by 15% and improving user experience consistency.
- **Contact: Golda Velez (Company Owner & Senior Backend Engineer)** (LinkedIn).

Open Source Maintainer – Create-wot-app & @web-of-trust/ui 2024/12 – present
LinkedTrust (*Remote*) remotely

- **Developed a CLI tool (create-wot-app)** that reduced project setup time by 30%, enabling rapid integration of Web of Trust UI components.
- **Built and published @web-of-trust/ui React library**, empowering developers with reusable credential management and authentication components.
- **Implemented advanced theming and schema support**, improving flexibility and reducing styling duplication by 40%.
- @web-of-trust/ui GitHub NPM & create-wot-app NPM

Full Stack Developer 2025/08 – present
Lynx – Premium E-Commerce Platform Freelance

- Built and deployed a responsive e-commerce platform with **Next.js 15, TypeScript, Firebase, and Supabase Storage**, including catalog, cart, checkout, and admin dashboard
- **Implemented Progressive Web App (PWA) features**, enabling offline access, push notifications, and an app-like user experience across devices.
- **Integrated Microsoft Clarity & Firebase Analytics**, enabling data-driven improvements and increasing customer engagement by 25%
- Real app: lynxwear.app · Demo: lynxwear.vercel.app/admin , lynxwear.vercel.app

Frontend Developer 2025/02 – Present
Contributor – EgyTrains (*Train Information Platform*) Remotely

- Contributed to the EgyTrains web platform (Next.js, Firebase) for train schedules and details in Egypt.
- **Improved SEO** using semantic HTML, structured metadata, and optimized meta tags, increasing search visibility by 30%.
- **Enhanced performance** with image optimization, code splitting, and Nextjs caching , reducing average load time from 3.2s to 1.4s (55% faster).
- Contact: **Ahmed Hany** (Senior Software Engineer & Project Owner) LinkedIn

Full Stack Developer 2024/07 – 2024/08
Tyba Transportation Freelance

- **Developed a responsive transportation platform**, ensuring smooth cross-device performance with Next.js and TypeScript.
- **Integrated Firebase authentication and real-time backend**, and built an admin dashboard, reducing manual operations by 40%.

Projects

E-commerce Template 2024/12

- **Designed and implemented a modern e-commerce UI** with Tailwind CSS and shadcn/ui, improving reusability of design components.

- **Implemented product listing, cart, login, and payments**, reducing setup time for future projects by 30%.

Landing Page (Next.js) 2024/12
- **Developed a responsive landing page** with Tailwind CSS and Framer Motion animations, improving visual appeal and engagement.
- **Optimized server-side rendering (SSR)**, improving performance and reducing initial load times by 20%.

Pardy (Social App) 2024/08
- **Built a social networking UI** with Next.js and TypeScript, delivering an engaging and responsive user experience.
- **Implemented backend features (JWT auth, Drizzle ORM, Zod validation)**, improving security and data consistency.

Fullstack-AI-Nextjs 2024/06
- **Developed an AI-powered application** using Next.js, React Hooks, and Recharts, enhancing user insights with interactive data visualization.
- **Integrated Prisma ORM, Neon DB, Clerk, and Langchain NLP**, enabling real-time authentication and AI-driven content generation.

Technical Skills

Learning & Growth
- **Continuous Learning:** Staying updated with React.js and web development trends
- **Industry Awareness:** Keeping up with emerging frontend technologies and tools

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS, MUI, shadcn/ui

Backend: Node.js, Express.js, Firebase, Supabase, Prisma, Drizzle ORM

Database: PostgreSQL, MongoDB, MySQL (Basic)

Tools: Git, GitHub, Webpack, CI/CD, Bash, Linux

Other: Recharts, Langchain, Framer Motion, Responsive Design, RESTful APIs

Soft Skills

Problem Solving • Communication • Team Collaboration • Adaptability • Time Management • Attention to Detail • Willingness to Learn

Education

Software Engineering 2023/01 – 2024/03
ALX SE at Holberton School online
Key Courses: Bash, C, Python, Javascript, Databases, Algorithms & Data Structures, Frontend, Backend, Networking, Linux, DevOps

Bachelor of Science in Computer Science 2019/10 – 2023/06
Aswan University
Graduation Grade: *Very Good*

Certificates

- ALX Africa Software Engineering
- Freecodecamp responsive-web-design
- Mahara Tech Database Fundamentals
- Orange Digital Center (ODC SE) Hackathon
